## CORE COMPETENCIES

### SAP / ERP Modernization & Sustainment

- S/4HANA planning, conversion support, production support, and sustainment.
- Configuration, integration, data migration, cleansing, reconciliation, and reporting.
- Incident triage, root-cause analysis, remediation, and live ERP run support.

### DevOps, SRE & System Reliability

- CI/CD, infrastructure-as-code, observability, release control, and operational hygiene.
- DevSecOps practices aligned to security, compliance, and mission continuity needs.
- Automated RCA and self-healing demonstrations for cloud-native operations.

### Applied AI & Automation

- OSHAL agent workflows, semantic search, document Q&A, and technical intake automation.
- Model comparison, cost control, workflow quality gates, and senior-review loops.
- Computer vision and image-recognition prototypes for automated response workflows.

### Custom Software & Data Engineering

- APIs, focused mission tools, browser applications, data pipelines, dashboards, and ETL.
- Python, Node, FastAPI, React, SQL, Postgres, Redis, Docker, and cloud-ready deployment patterns.

## PROOF POINTS

### 25 years SAP / ERP

Principal-level enterprise systems experience across production support, integration, data, and operations.

### Product prototypes

Voice intake, planning, workforce intelligence, model comparison, semantic search, and RCA demonstrations.

### Cleared engineering

SECRET-cleared engineers on staff near Eglin AFB and Hurlburt Field.

### AI governance

Provider-neutral model comparison across cost, latency, token use, answer quality, and workflow review gates.

## COMPANY DATA

LEGAL	Emerald Coast Systems Group, LLC
EST.	June 3, 2026
SIZE	Small Business
PRIMARY	NAICS 541512
OTHER	541511, 541519, 518210, 513210, 541611
UEI/CAGE	SAM registration / UEI / CAGE application in process
CLEARANCE	SECRET-cleared engineers on staff
PATHS	Prime teaming, subcontracting, open market, simplified acquisition, pilot / proof of value

Applications in process: WOSB / EDWOSB, HUBZone, GSA MAS, and 8(a). Current status available on request.

## DIFFERENTIATORS

- Focused federal systems firm with experienced principals and a narrow, credible technical lane.
- SECRET-cleared engineering capacity near Northwest Florida's defense corridor.
- Working software demonstrations instead of generic capability claims.
- Small-business fit for specialized subcontract scope, pilots, and bounded modernization tasks.
- AI used with engineering controls: review gates, cost visibility, and human accountability.

## TECHNICAL STACK

**First-award posture:** ECSG was established June 3, 2026 and is building its corporate federal record. Evaluation can begin with principal experience, working prototypes, technical walkthroughs, and partner-ready scope.
